		Max. saving	Carbon output reductions	Equivalent to driving	Equivalent to planting	Tick when done	
..... Cost £0 - 50	1	A quick fix! Draught-proofing and hole-fixing will help keep the cold out and help to reduce your bills.	£125	256kg	112 miles	9 trees	<input checked="" type="checkbox"/>
	2	Save money with a snappier singalong! Keeping your showers to 4 minutes means less water, less energy, and less cost.	£95	194kg	85 miles	7 trees	<input checked="" type="checkbox"/>
	3	Lower the flow. If the water in your radiators is too hot, turning your central heating boiler flow temperature down will help to reduce your bills.*	£112	467kg	204 miles	17 trees	<input checked="" type="checkbox"/>
	4	Small change, big difference. Turning your room thermostat down by 1°C can mean impressive savings!	£145	297kg	130 miles	11 trees	<input checked="" type="checkbox"/>
..... Cost £100 - 1000	5	Heat rises, but your bills needn't. Insulate your loft with 270mm and feel cosy this winter.	£590	1,208kg	529 miles	45 trees	<input checked="" type="checkbox"/>
	6	Take control! Maximise your efficiency and minimise your energy bills, with smart controls.	£180	368kg	161 miles	13 trees	<input checked="" type="checkbox"/>
..... Cost £1000+	7	New boiler, less stress. If you've got an older G-rated boiler from the early 2000's you could save significantly by upgrading!	£840	1,720kg	753 miles	64 trees	<input checked="" type="checkbox"/>
	8	Go green. Keep your bills and carbon footprint down by swapping your old boiler for a new heat pump or hybrid system.	£395	3,200kg	1,402 miles	120 trees	<input checked="" type="checkbox"/>

Scan, save and smile!

For more details on the savings listed here, and further ways to save, head over to our website www.worcester-bosch.co.uk/energy-saving-tips

Savings are demonstrated in isolation. Energy saving tips and associated savings are taken from the Energy Saving Trust, excluding our 'central heating boiler flow temperature' tip. For full information visit our website via the link above.

*Applies to gas fired condensing combination boilers only. If you have a boiler fitted between 2005-2018, plus intelligent heating controls (including our Bosch EasyControl, Comfort control and our Wave control) or weather compensation controls, your boiler does this automatically without you having to make any changes.
